Broomfield offers expandable winding mandrels in both round and rectangular configurations that will collapse for easy coil removal, as well as numerous types of product holding tooling for many different applications.

Mandrel designs include quick removal from the machine, self-supporting and swing-out styles with headstock/tailstock safety interlocks. Grooved edge collapsible tooling for higher quality precision layering and increased production of magnet wire coils. In addition to our hundreds of mandrel and tooling products, we can custom design and manufacture to your application needs.

For nearly 25 years, Broomfield winding mandrels and tooling have offered industrial grade strength and high precision to provide for the best quality, consistency and production of your wound products.
